

Town of Lisbon, Maine
Conservation Commission Agenda
January 15, 2019, 6:00 p.m. @ Frank's

- 1) Call to order
- 2) Jamie Chappell of "Garbage to Gardens" will speak of the composting of household waste and removal from the waste stream and tipping fees. He will probably speak about 20 minutes and will answer questions from members.
- 3) Report from Richard regarding information on the percentage of residents who regularly use the transfer station and the residents who use a private commercial hauler. I also hope to get a report from the on-line survey, taken several weeks ago.
- 4) Annica hopes to have information regarding backyard composting possibilities.
- 5) Discussion and decision on whether or not to recommend to the Town Council that a kiosk at the Transfer Station for compost drop-off be set up and the budget appropriate monies for the weekly cost of pickup. I would estimate the monthly cost to be between \$50 - \$135. The figures are only estimates and would require town staff submitting formal requests for the budget.
- 6) Alan S. will bring us up to date on the LED streetlight opportunities and maybe the possibility of municipal solar installations.
- 7) Beaver Park and Summer Street Park GPS mapping progress report.
- 8) Other business.
