Dear Sir:-

I find that the sewer assessment made in September, 1899, upon property owned by you in Lisbon, has not been paid. the statute provides that if such assessments are not paid within three months from the date when they are made, the Treasurer shall proceed and sell the lots upon which the assessments remain unpaid, or so much thereof, at public auction, as is necessary to pay such assessments, and all costs and incidental charges; and the sale is to be made in the same manner as a sale of real estate for taxes.

As you will see, I am obliged by law to proceed, and must request you to make an immediate settlement.

Dear sir:-

I have staked out Water Street at Lisbon Village a description of which is as follows.

Beginning on the NorthWesterly side line of Webster Street, as laid out by the County Commissioners in the year 1905, at an iron pipe driven into the ground, said iron pipe standing 102.09 feet distant and bearing North 55 Degrees and 28 Minutes East from an iron pipe driven into the ground which forms the angle point in said side line near the bridge.

Thence running North 10 Degrees West, 850.00 feet to an iron pipe driven into the ground and passing a point standing 16.70 feet distant Westerly from the Southwest corner board of a dwelling house numbered 1, also 14.80 feet distant Westerly from the Northwest corner board of dwelling house numbered 3, also 29.27 feet distant Westerly from the Northwest cornerboard of dwelling house numbered 6 said dwelling houses being owned by the Mill Company and numbered in rotation beginning at Webster Street, as they now stand.

The described line to form the Easterly side line of a street to be fifty feet in width and to be known as River Street. The said street throughout its entire length, extending from Webster Street Northerly passes over land of the International Cotton Company.

Mr Arthur O White,

Dear sir:-

I have staked out the location of Webster Street at its junction with Ridge Street at Lisbon Village using the records of the County Commissioners book 4 page 463.

The Commissioners records dated 1905 call for an iron pin driven into the ground which pin is at the intersection of the center lines of Webster and Ridge Streets both of which streets are laid out fifty feet in width.

On making a careful search I failed to find the iron as called for but at the point where the iron should be (using measurements from existing monuments on Webster and Ridge Streets) I found a well preserved surveyors stake which I have carefully tied in and as the stake stands about five feet below the present surface of the highway I have placed an iron pipe over the stake bringing the same to within about nine inches of the surface.

Following is a sketch showing location of the point as described above which also shows on my field book No 90 page 17.
