 - 1. He spoke of hard and brown water.
 - a.) Mr. Alexander let him know that we are currently working on the hard water issue by installing a system that will treat the calcium
 - b.) Mr. Alexander added that this system will coat the inside of the pipes that will also help with the brown water but there will be an adjustment period where it may get worse before it gets better
 - c.) Ms. Reynolds stated that it takes a long time to get projects approved; it has to go to an engineer for design, the design needs to be approved, we are now short staffed which will delay the project as well
 - 2. Since December he has spent \$7600 in repairs, including replacing a boiler
 - 3. His water filtration system needs changing far too often
 - 4. Last year when the fire department flushed at the school, he had no water and he could not get anyone from the Water Department so he had to call the Police Department
 - 5. Mr. Saucier wants to know what the money, the voters approved for replacing lines, has been spent on
 - a) Ms. Reynolds explained that in 2014 we took 1.5 million of which we still have 1 million
 - b) The Route 125 project (State) is set to start in the spring of 2022 so we need to hold funds to start paying for that as we cannot get more bond money before the first payments are due. Once we can get more bond money, we will be able to move forward with the replacement of water mains.
